

IN THE CLAIMS:

Please amend the claims as follows:

1. **(Currently Amended)** A rotor for a permanent magnet type motor, comprising:

a rotor yoke;

a permanent magnet connected on a surface of the rotor yoke; and

a metal film which is disposed between the rotor yoke and the permanent magnet,

wherein the rotor yoke and the permanent magnet are subjected to beam welding only at a microscopic connection interface area located between the permanent magnet and the rotor yoke.

2. **(Original)** The rotor for a permanent magnet type motor according to claim 1, wherein the metal film is formed on a surface of the permanent magnet.

3. **(Previously Presented)** The rotor for a permanent magnet type motor according to claim 1, wherein the metal film has a thickness of 25 to 90 μm .

4. **(Previously Presented)** The rotor for a permanent magnet type motor according to claim 1, wherein the metal film contains at least of one of nickel and copper.

5. **(Original)** The rotor for a permanent magnet type motor according to claim 4, wherein the metal film has a copper film composed of copper and a nickel film composed of nickel.

6. **(Previously Presented)** The rotor for a permanent magnet type motor according to claim 1, wherein the rotor yoke has a stacked structure.
